

ALTICE USA PARTNERS WITH STAMFORD BOYS & GIRLS CLUB TO PROMOTE BROADBAND AVAILABILITY

Dr. Michael Cotela, Executive Director, Boys & Girls Club of Stamford, US Representative Jim Himes, Connecticut State Representative William Tong and Laura Jordan, Director of Government Affairs, Altice USA with local area students at the Stamford Boys and Girls Club where Altice USA held an event to promote broadband availability as part of the launch of its "Economy Internet" program.

Stamford, Connecticut - September 21, 2017 – On Tuesday, U. S. Representative Jim Himes and State Representative William Tong joined together with Altice USA (NYSE: ATUS), one of the largest broadband communications and video services providers in the United States, at the Stamford, Connecticut Boys & Girls Club to raise awareness of the company's new 'Economy Internet' service and promote adoption among qualifying households. At the event, 80 students participated in a conversation about the role of technology in their lives and how it has become necessary for education success.

Altice USA is partnering with community organizations across its service area to promote its 'Economy Internet' low-cost broadband service, which is available throughout the Optimum and Suddenlink footprints, providing eligible families and senior citizens with access to fast, high-quality internet connectivity at an affordable price.

The \$14.99 per month service, which offers broadband speeds of up to 30 Mbps downstream and free in-home WiFi, is now available across the entire Optimum footprint after launching in select areas of the New York region late last year. In addition, the company is going beyond its public interest commitment to Optimum in New York, New Jersey and Connecticut by extending this service to the vast majority of the Suddenlink region so that hundreds of thousands of eligible consumers within the Company's service area have access to fast, affordable internet in their homes.

In addition to announcing the availability of Economy Internet as an affordable option for broadband at home, Altice USA is providing free broadband connectivity at the Stamford Boys &

Girls Club intended to give community member's access to the Internet at no charge while they are in the club.

"Altice is pleased to partner with the Stamford Boys and Girls Club," said Lee Schroeder, senior vice president, government and community affairs. "Altice believes access to technology will support education success as students develop the skills necessary to become critical thinkers, problem solvers and future innovators. We are committed to programs that help bridge the digital divide within our local communities, and ensuring that consumers across the country have access to Internet connectivity."

"The Internet provides access to a world of knowledge and resources that kids and families today simply cannot live without," said US Representative Jim Himes. "I'm grateful that we have companies in our community like Altice that are providing affordable options and are committed to help bridge the digital divide."

"Thanks to Altice and the Stamford Boys and Girls for working together to ensure today's youth have access to broadband in their community and through an affordable option at home," said State Representative William Tong.

"We are happy to partner with Altice and help spread the word about the importance of accessible and equitable broadband services for everyone in our community," said Dr. Michael Cotela, Executive Director of the Boys & Girls Club of Stamford.

Altice USA works with hundreds of community centers and libraries to provide free broadband in computer labs and other public spaces, enabling residents with access to high-speed internet at no charge in their communities.
